

## Smoke™'s Money Making Guides

First method is called the forum method. It is also insanelly amazing but with this method, the more you work on it the more you will earn. The idea behind this is not to spam your link on forums and hope for downloads, that never works. People will only download your file if they want it. This technique has two sub techniques to it. The first way is to find highly populated forums and post something very related.

Here is an example: lets say we have a highly populated guitar forum. The idea is to offer a download to a file that everyone on the forum can use. Every guitarist can use some tips. Google "guitar tips e-book" and find something you like. Then upload it to sharecash and start a thread on the forum. You have to mention its free and mention that it's a must have even for professionals. And that's it! Watch how many people download your file! It's insane!

The other sub technique may cost you a few bucks but is far more effective. Lets have an example: we're still on our guitar forum and there is a user with 20,000 posts. This means his posts are basically ALL over the forum. Every user has a signature which is a set picture/text at the bottom of every of the users posts. All you have to do is offer that user for example \$20/month to rent his signature space. In that signature space you will have a few of your sharecash download links with related downloads (such as the mentioned guitar tips) that will be displayed under every one of that users posts. That means that your download links are everywhere for everyone to see, click and make you money. This is the most profitable technique but it may cost you a little to rent the signature space.

Another way to make insane money is free advertising of your links using for eg. Youtube.

There are many ways you can attempt this. One way is to literally take a real advert of a product (that you have uploaded to sharecash of course) and just put your download link in the description. This is very effective especially if your video is the only one there for that product (but that is extremely rare).

Another way to take advantage of youtube is to make your own advert for something your supplying a download link for. You can either review the product or film your own (if its funny it helps) advert for the product and just supply the link. A third way to advertise your links via youtube is to reply to videos. Find videos that have something to do with your download and just comment on the videos posting your download link.

A fourth way is similar to the second forum method. Pay someone who has a popular video to post your download link in his or her video. If that video happens to have something to do with your download this option is a must!

Method: when you get to gametrailers.com go to the "Popular Now Tab."

After you do that you should see a list of games that are the most popular today. Hit the first one the you see on that tab.

After you do that go to thepiratebay.org and go get the game you see.

( the torrent doesn't have to be working, this is so the file size looks big enough to be that game).  
Then download that torrent and when it's done downloading put the torrent on your desktop.  
Right click the torrent files and hit add to archive. After you do that the .rar file should be on your desktop  
When your done open it back up to make sure you put the file in.  
When your done go back to sharecash.org and upload your file.  
Get your download link and head over to gamespot.com and go to the forum section. You will need to sign up for gamespot.  
After you sign up go to the forums section and post your download link in the forums saying it's legit and it's the real download and that it works 100%. A lot of people will start downloading your file in minutes.  
Your can do this with all the sites.

Method: Head over to blog.com

When you get there sign up and make your own blog site.  
When you do that spread your blog on all the game forums to get a lot of traffic.  
Upload your file from the 1st Technique to sharecash.org  
When you do that post the download link on your blog. But you have to be specific saying what it is not just posting the download link. Write a paragraph on what it is and post your download link.  
When you put the download link and the paragraph on your blog, go to all of the game forums above and post your blog there. After about 24 hours you should have a lot of traffic on your blog and the people will be downloading your stuff.

Method: Facebook, 5000 fans and friends, blog, fanpage.

An ebook about anything.

(you cannot use this ebook for that if you want to you will need resale rights for \$10).

Go get a random ebook and upload it to sharecash. (Ill tell you why later).

I suggest you making a girl facebook because more guys play games and guys add girls. Make your picture like a flower or something not a picture from google.

Or just buy a girl facebook page that has a lot of friends on it.

I suggest you making a fanpage when you have at least 4500 friends.

After you make the fanpage put your blog with the random ebook on it.

After you how your fanpage, email all of your friends on your facebook saying that you have a fanpage and that

you have an ebook about making money (which you don't it's just a random ebook).

Give them your blog and put

the random ebook on the blog, and give them the download link to. So they have three things to pick from.

(fanpage, blog, and download).

After you email them all you should have a lot of traffic and they should be downloading stuff.

Method: What you will need: Youtube, winrar, blog, sharecash file from 1st Technique, game trailer from gametrailers.com

Go to gametrailers.com and get a trailer for the game you want.

Save the trailer to your desktop.

Get the game from the trailer and go to a torrent site and download that game torrent (the game doesn't need to be working just to look like to file size is legit.

After you get the torrent put the torrent files on your desktop.  
Right click on it and hit "Archive." After that it should be on your desktop.  
Upload your .rar file to sharecash.  
After you do that go to Youtube.com and upload your trailer.  
Put the sharecash download in the video description. Put the title - "GAME FREE  
DOWNLOAD".  
After it is done wait and you should have a lot of traffic to your video.

## Facebook Method

### WHAT YOU NEED:

- A Facebook Account
- A Freelancer Account
- An Account on any CPA network

### 6 STEP METHOD:

1. Login to your CPA network. Browse through all of the offers with "first page submit" short forms where you get paid per lead. The reason for this is because people are most likely to fill out a short first page form than a long 3 page submit. These offers usually payout between \$2 to \$5. Find offers that have good looking landing pages that are trustworthy and easy to fill out. The less personal information the user has to submit the more likely they are to fill out your offer.
2. Login to your Facebook account and create a fan page. The name of your fan page should attract the type of people who are likely to fill out your CPA offer. This is one of the most cost effective ways to target people on Facebook. REMEMBER: the name of your page is what attracts your target market. Then go to Google images and select an appropriate image for your group. Make sure to find an image that is professional looking (think stock image quality). Save this image to your desktop. Choose the appropriate category for your page, publish it, upload your image to the profile picture, and fill out the information on your "Info" tab.
3. Login to your Freelancer account and post a project for someone to "add fans" to your Facebook fan page. You're essentially hiring a promoter or someone to do the work for you. Your title should read something like: "I need someone to add 100,000 fans to my Facebook page." The description does not need to be too long, just copy your title and tell them to PM you if they have questions. Wait about a day or two to let the bids build up before selecting a winner. When you select the winning bidder it takes you to a screen where you can "check" the box next to each bidders name. This is a sneaky way to hire multiple people if you want to. Once the winning bidder has accepted your job, email them the link to your Facebook page along with a more in depth job description.
4. Once your page reaches 10,000+ people, Facebook will make you verify that you are the owner of the page. If you do not verify it they will block your publishing rights to the page, making this whole process a big waste of time. Here's how to verify: Get an account at blogger.com. Post some BS blog entries. Use this new blogger domain as your official URL. Go to your Facebook page and click "Edit Page." Under "Promote Your Page" click "Promote with a fan box" and click the Blogger icon. You will then log into your blogger account and the Facebook fan box will be present on your blog. Now your page is verified and set to go! DO NOT POST ANY CPA OFFERS BEFORE YOUR PAGE IS VERIFIED!
5. Now that you have more than 10k fans in your fan page and have verified it, you can start promoting your CPA offer. You can do this by updating the status of your group or sending out a mass message to all members. To update your status, put the text portion of your ad into the text field and copy and paste the link into the link box in the tool bar below the text field. Once your link is attached and your message is crafted, press submit. This status update will be sent to all of your fans' mini feeds and will be available for new fans to see. Don't forget to mix your CPA posts with normal posts that fit in with the flow of your page. You want the fans to think it's a legit page (which it is) not a spam page. Do the same for messages.
6. Now that your page is big, create more Facebook pages and use your original page

to drive traffic to those pages. Eventually you will have a large network of Facebook pages...a network that will eventually span more than 1 million people! You can now drive this traffic wherever you want! Make sure your users do not become immune to your page updates. If you're constantly posting new updates they may get turned off. However, if one CPA offer is doing well, keep reposting it every other day (Just remove the original update from your page before you re-submit it). I recommend only a few NEW updates per week per page.

The steps mentioned above have worked for me. I'm making about \$300 per day on average. My own network of pages continues to grow, so I'm consistently making more money each month. It takes time to grow your pages and build your network, but once you have it, it's a very powerful traffic driving tool that will make you tons of money!

#### Minute Workers

1) Firstly make an account on [www.sharecash.org](http://www.sharecash.org)  
Go to <http://sharecash.org/register.php> and make an account!

2) Make a simple text file and write anything in that file like "I am sick" :P etc.. and upload it on sharecash!  
Note:- You must remember what you had written in that file! It would be required later on.

3) Now your file is ready to download! But the question arises now that "Who the fuck will download my file and how will I get money?"

Here is the solution to it!

There is a site called Minute workers

<http://minuteworkers.com>

People do small small jobs there and earn money!

They around 0.10\$ for every job they do! So now you are going to give job to the people :D

1) Go to <http://minuteworkers.com/register.php> and register an Account for yourself!

2)After logging into your account go to Create Jobs option in the left

3)Fill in the exact information as shown in the images below

Then click on submit!

You will pay every worker 0.10\$ for every file he downloads and he must give the text written in your file that you had written in the starting as a proof of his download!

People will run to you for completing your job offer and you will earn a loads of cash at sharecash through it!

Note:- You will have 1.10\$ in your minute workers account from starting only! So you can make around 5.50\$ without investing anything :D

The more you give jobs to the people the more you earn from sharecash!

If you invest maximum 15\$ then also you earn 75\$ a day!

And after your get paid in paypal by sharecash invest more money and make more money =D

This is a simple but VERY POWERFULL way of

earning money! This runs on auto pilot as once you have setup the job and everything then you only need to pay the workers for their downloads and nothing else! Best of luck making money through it.

#### TIPS FOR SHARECASH

1) A good thing, which will raise your downloads is porn. Porn sells, and everyone knows that. The best way to get a lot of downloads is to upload and post fake (or real, if you have) pornpasses on MASS porn forums, (remember you have to be 18 years or older to do this, just in case you don't know ). This is my most used method so far!

2) Youtube promoting. You can upload some good things to youtube and place a download link to whatever you want in the description.. I'm using a fake habbo hack at the moment, and allready got 60 downloads after a week. Make your own twist on it

3) Blog spamming. I haven't tried this yet, but at some blogs you'll be able to comment it's content, you can spam your downloads link everywhere..

Also, another and proved working method, is to create your own blog, about game hacks, cheats, (or maybe porn?), where you can offer download links for all of it

4) Torrents. Torrents and other P2P programs might aswell work out for you, this is an automated way to earn money, what you do is that you upload a good program/movie/game or whatever, and in the torrent, you place a readme.txt file that tells the downloader to download another txt file with the password to the program.. this txt is in this matter uploaded to sharecash. You'll get some good downloads by this method.

5) If you know habbo, you might also know that a LOT of kids plays this everyday. Create a new account on habbo.com (Only US residents are at that server, so all downloads from there will be valid), remember to use a proxy though, last time i tried i was unable to register there as my ip is from Denmark. Log in, and mass spam your download link for a fake (or real, doesn't matter) habbo hack. You'll notice that a lot of people at the habbo hotel will be asking for further information, and even add you as friend. Also a lot wont ask any questions and just download your file right ahead!

#### Getting Referrals

Getting referrals is a big part of how successful you are investing time in Paidto-Click

(PTC), Paid-to-Read (PTR), affiliate programs, or any other program where referrals have a direct impact on your income. Increasing the amount of referrals you have dramatically increases the amount of money you make.

You will realise that there are many other people in the same situation trying to get

people to join via their ref links also. So its as hard as cracking nuts. Follow some of

these tips and your sure to have some more ref's in no time.

So how do you actually get referrers I will examine the ways to get people to join

using  
your refer link.  
Getting referrers takes some effort and some time, but you can get a lot of  
referrers take  
the time to try and get them, for example, while you are doing your clicking open  
another  
tab and signup/post on some forums, add a post to your blog, all you need is 1 hour  
a  
day and you can click all your ads on 5-10 different sites and do some advertising  
all at  
the same time.  
Everyone is trying to get referrers so what can you do to have an edge and be the  
one  
who gets MORE referrers than the competition? Here are some tips for you.  
Forums / Message Boards  
Place referral links in your signature, Create a post containing your referral  
links, and  
Link the "www" under your avatar to your forum post, now every time you write a  
response the signature well placed automatic under your response.  
Don't try to add links to your response because than you going to be a "spammer"  
and spammers get bend from all forums. This is very important!  
Some good forums to post on are your general forums about working from home as  
these people are looking for ways to make more income working from home. See the  
resource section at the end of this guide for a list of forums.  
Blogs and Websites  
A blog or website will help you keep track of the PTC sites you are currently one,  
it will  
also allow you to review some of the sites you have tried and advertise some of the  
ones  
you are currently using or trying out, basically the nice thing about a blog is  
that it's a  
great way to keep track of what your currently doing in the PTC worked and to make  
this  
public so that you can make money from ad sense as well as gaining referrers to the  
PTC sites you are promoting. Try using one of the free blog sites around to start  
with  
and if your happy then move to a more permanent one with your won domain name.  
Also you can promote your blog link in your forum postings too.  
This may be the most time-consuming of all the methods, depending on how much time  
you spend on it. BUT, it is well worth the effort if you do it right.  
Squidoo is a perfect site to use as it gets tons of traffic and attention. Plus,  
you get to  
see how many people visit your lens as well as what links they click on. For the  
best  
results, you should build a lens that is informative, nice to look at, and  
wellorganized.  
If  
you build your lens well, you will get a high ranking and your lens will be  
featured on  
Squidoo search, and you will get tons of visits. You should take some space on your  
lens to explain what PTC is. This is in case a visitor comes to your site with no  
prior  
knowledge of PTC's. You want to explain it in a way that is simple and inviting,  
but do  
NOT exaggerate.  
Please, do not make false claims to get referrals. If you claim that they will make  
thousands a month, I promise that once they sign up and see 10 \$.01 ads, they will  
do  
the math themselves. You don't just want signups, you want active referrals. To get

active referrals, you have to show the visitor how they can succeed in this business.

Otherwise, they will be discouraged by the small amounts they will earn at first. Emphasize patience and referrals. This is how they will make money with PTC's, and if they make money, you make money. When you post your referral links (preferably banners), do not just string them all together, this is unappealing as well as uninformative.

Visitors are impressed by numbers and stats. Tell a little bit about each one, do you have any comments on it? Which are your favourites? Fastest earners? Just give all the information that you think is relevant. This will inform the reader that you have put thought into it. The last thing you have to do is promote your site. This can be done in many ways. Squidoo has a frame breaker embedded in its code, so it will not work in Traffic Exchanges. The best way to promote is to post your link everywhere. If you have a MySpace or facebook profile, post your link there. If you have another site on the web, link to your lens. Also, post your link on all the forums you belong to. You should email your friends and family. Submit your website URL to Yahoo and Google. You can also get visits to your site by joining a group related to your topic. This is great traffic because those people are most likely already interested in your subject - a rapt audience. If you build a site that is appealing, convincing, and informative, and you promote that site, you will get referrals. Not all your referrals will stay active, however many in fact will. Furthermore, the great fact is that they can leave you comments, so you can interact with them, help them, and encourage them to be active.

#### Email

Send an email to everyone you know who might like the PTC idea or want to find additional PTC sites. Don't go spamming people! Use appropriate etiquette to all people you send your emails too!

#### Refer people you know

This might not be the best of ideas or appropriate in some situations but if you know

some people out there who might like the idea of PTC then tell them about it and maybe

tell them about your blog, website, forum post and so on.

The nice thing about PTC sites is you can tell everyone about them and about your blog

and they are all FREE to join so no one will get 'hurt' in the process if things go wrong,

all they have lost is time not money, but do warn them that you are aware PTC sites have a bad reputation and that you are trying to only promote the ones you personally believe in.

#### Live chat programs

Advertising your referrals in online chat rooms and IM programs can get a lot of people's

attention however make sure to use the appropriate etiquette and ensure not to break

the house rules by spamming.

Advertising in the real world

Create flyer's and distribute them on public notice boards, hand to hand, advertising in newspapers, local newspaper and so on... make sure it's appropriate and you obey any laws in your area. You will be amazed at how effective this can be especially on public bill boards.

Advertise on PTC and other types of sites

Advertising using PTC sites, make sure that you don't advertising in the same PTC site that you are try to get Referrals because people that see your ad is already registered to the same site.

Advertising on PTC sites is relatively cheap for the number of people that you will get seeing your advert, but it's not always very effective i.e. expect 1-2 referrals from every 500-1000 views.

Advertise at Free Traffic exchange sites

Traffic Exchanges are basically sites that offer its members the ability to advertise their links and banners for free after viewing other links and banners.

Here's how it works: You sign-up as a member of a Traffic Exchange site. You then must view ads like you do for PTC sites, but instead of getting paid for your clicks; you are able to advertise your banners and links. Traffic exchanges usually offer some type of ratio for exchange. For instance, a site that offers 1:1 ratio means that you can get one click on your referral link or banner for every one click that you make. You will surf for ad links in exchange for your own advertisements. Some of these sites may even pay you for surfing, so you will hit 2 birds in one stone.

More Good Methods :)

Its all about hard work. Hard work=More Earnings

1. Youtube Accounts

-Have access to some youtube accounts

2. Youtube Bot

-Get a youtube bot. (one that can comment and rate a video)

3. Idea

-Think of a something that a lot of people would want to download for example what i do is i upload videos of keygen's and programs (some even fake programs) and a lot people downloads them. You have to think outside of the box!

4. Comments

- Now use the youtube bot to your advantage. spam the crap out of your video(s)

with positive comments but this all depends on how many youtube accounts you have. If you are looking for a good amount of earnings i suggest doing 50+ comments on a video. If you follow these guidelines you will be successful with sharecash. Of course you may not get the results right away this can take time and your video(s) will need to get a lot of views to get people to watch it.

- 
1. Found popular poker room (place where peoples play poker online).
  2. Make ~9MB .exe file call it "[poker room name]BotInstall.exe" (FullTiltPokerBotInstall.exe)
  3. Upload it to sharecash and short file url with <http://bit.ly/>
  4. Find a table with many people watching game (table with very high bets).
  5. Write to a chat message like: "HI download fulltiltpoker bot here [link]".
  6. If you would not get banned, repeat 5.
- Good luck!

---

This method is one of the best to start off with, what we're going to be doing is supplying game cheats/hacks or whatever you want to call them, to gamers, we're going to contact the gamers through forums in this method, but in later methods, we'll be covering other ways of promoting your sharecash download link for this method, but forums are the best place to start

Step 1) Finding a game download to promote

We first need to find a file to upload to sharecash, with a bit of help from Google, this isn't really very hard to do, select a game, in this example, we're using Gunz: The Online Duel, so we'll search "gunz cheats" and "gunz hacks", go through what comes up, then download the files that come up. You may have to sign up to forums to get access to the file download links.

Step 2) Uploading the game file to sharecash

You obviously need to login to your sharecash account, if you don't already have a sharecash account, you should sign up now, as you need a sharecash account to upload files to sharecash, okay so once you've uploaded the files to sharecash, grab the download links, make sure you know what link is for what cheat/hack, you don't want to get mixed up!

Step 3) Promoting the file download This is super easy, just take the sharecash download link you got, then go back to

Google, search for some forums around the game, lets take gunz as the example, "Gunz forums", then you go into more detailed forums "gunz clan forums" "gunz guild forums" "gunz cheating forums" "gunz hacking forums". Once you've got some results, start signing up to the forums, then simply post a topic in the most viewed section about the cheat/hack, give it a good title "Amazing Gunz AIM Bot, 100% working & safe", within the topic, try to have some pictures/videos of the cheat/hack/software/gunz, along with a anti virus scan and of course the download link.

Step 4) Rinse & Repeat!

This is the great part about this method, you can do it over and over again, there are thousands of forums for every game, there are thousands of games to pick cheats/hacks from, there are thousands of places to promote your sharecash download link, so what are you waiting for? Get out there and get promoting!

Even Some more beast Methods :)

#### Method 1: Youtube

This is an easy way to get started. People will download anything from youtube. So to get started make sure you have an account with youtube. Next go over to daily motion and find a good strip tease video where the girl gets naked at some point in the video. Download the video from daily motion using [www.keepvid.com](http://www.keepvid.com) and fire up windows movie maker. The idea is that we want to post the video up to the point where it becomes obvious that the girl is about to show off some skin (boobs or bottom half) and then we cut the video right there. Now what your going to do is upload the cut portion to youtube. Since there is no actual nudity in this video (since you cut it out) youtube will not take the video down. Upload the entire video to sharecash and put the link in the description box next to your video. Give the video a long sexy name and watch as people download the entire video from your link in order to see the girl naked! Tons of people search for girls on Youtube so your videos will get plenty of views very fast.

#### Method 2: Orkut and Myspace method

Signup to yahoo and myspace account. Make around 300-400 friends on them. It will take little bit of time but you can do it easily if you spend around 1 hour daily on that and add around 50 persons a day. Its not so easy but its not even so hard. I got around 500 friends within two weeks. Most important thing: Concentrate only of UK, US and Canada people because sharecash only pays for these countries signups. It would be much easier for you if you join US and UK communities. If you are comfortable then try to make your profile by a girl's name. Mostly people add a girl more commonly than a guy. After creating a ID with 400-500 friends. Add your uploaded pic in your profile or update status. For example: Create a notepad file. Clock it with your sharecash link and add in your profile. Encourage peoples to download your file by saying that this is your phone number, coolest or sexiest pic of -- Converted from Word to PDF for free by Fast PDF -- [www.fastpdf.com](http://www.fastpdf.com) -- yours, or be wilder like this is my nude cam show download it. There will be many hornies there to download your stuff. Update your profile daily and keep on adding more US and UK friends.

#### Method 3: Forums are your friend!

Ahh yes forums my favorite place to get downloads from. So what we're gonna do for this method is find any porn forum and copy a few porn passwords that people post up. If you

just look around at a few places like <http://forum.dumpstersluts.com/> you'll find a few passwords. Now go ahead and copy those passwords into a text document and archive it with winrar. Here's where we're going to do things a little differently. Most people will go and outright post these files on the forums with your download link. Now this will bring in a few bucks, but when the passwords run out or someone sees a few postings about how they already use these passwords, your thread is pretty much dead. Instead your going to sign up to as many porn forums as you can and place your download link in your signatur with anchor text such as "Free GangBros Passwords." Then just post all over the place saying things like "Wow nice video" or "Thanks for the videos" stuff like that so people will see your name and signature. If the forum will not allow your download link in the signature just make a free blogger blog with the download link on there and have your signature redirect them there with the same achor text. You will see huge traffic with this method, trust me everyone wants free porn passwords!

#### Method 4: Roms and Emulators

This is my biggest money maker by far, and its actually pretty easy to set up. The only reason that this is the most advanced method is because it requires a few things such as a website, hosting and some experience in creating a website and making it look decent. If you can make this method happen you will see a huge amount of downloads come through. What you do is search for nintendo ds roms and emulators in google. Now when you find a good site just download as many as you can. I use a few sites to download ds roms, but starting up I just went to mininova and downloaded a huge file with like 100+ ds roms. This got my site off the ground much faster and took the hassle out of downloading a 100 or so files seperately. Just upload all the files to sharecash seperately and post them on your new website. If you keep your site updated with new releases you can get a couple thousand downloads in a day easy. If you submit your site to any of the top 100 Rom lists you can get some awesome traffic that way. Altermatively you can submit to digg and reddit claiming that you've found the best DS Rom site on the web. Just remember to put a disclaimer on your site stating that all roms downloaded need to be deleted within 24 hours unless the legal copy is owned. That statement will keep your rom site legal so dont forget it!

#### Method 5: Digital Comics

Digital Comics are very popular on the web currently, and no one is using sharecash to promote online comics. There are a few things you can do here. For one you can

visit  
<http://www.lorencollins.net/freecomix/> and download a few comics and then post them on a blogger blog. Of course digg traffic works well here since comics usually cost money to  
-- Converted from Word to PDF for free by Fast PDF -- [www.fastpdf.com](http://www.fastpdf.com) --  
download online. Another way to explode this is to use a site called 4chan.org. Now what you do is visit the comic section pick a comic book you downloaded and post the front cover and then next to that post the download link. A small description will help with this and get a couple people commenting on it. Again everyone loves free comics and 4chan is a great place to get your comics downloaded.

#### Method 6: Exploit Lazyness

This is probably my favorite method just because its actually very creative. What you need to do is go to any manual traffic exchange (look on google you'll find a ton) and sign up to a few. Upload a large picture or any small program that is about 1 to 2 megs in size and name it "Traffic Exchange Bot." Make a quick blogger blog and delete everything from the page except for the post and title. Make The title large and the body easy to read. State that you have a free traffic exchange bot that they can have to use for the traffic exchange they are on. You can customize the page and make one for each traffic exchange you use. People will download the file hoping for a bot, even if you dont have a bot for them to download once they download the file and see that its not a bot they will more than likely just move on with their traffic exchanging while you just got a download out of it! Make sure you .rar the file that you upload so it appears believable. You can participate in the exchange to get credits or just buy some, either way you will get conversions easily since everyone hates having to do manual traffic exchanges.

#### Method 7: Current Blackhat Niche Method: Michael Jackson

of course!  
Download a dramatic looking picture of Michael Jackson (A close up of his face or whatever) and edit the photo by placing a caption of a quote and his life span (1958-2009 or whatever). Throw up a blogger blog saying everyone should pray for Michael Jackson and download this picture and put it as their background for their computer. There are way to many nuts out there for this not to work! Put a link to it on digg and reddit with a title saying something like "Support Michael Jackson's family, download this picture and place it as your background. Pictures honoring the king of pop" Just remember to make your title as long as possible and you'll be fine!

Method8: Take help of websites or blogs

It was the simplest method and yet most reliable method. If you have a good website which got

around 1K-2K visitors per day then create a simple banner and clock it with your sharecash

URL. Try to give free ebooks related to your niche. Peoples just love free stuffs. For getting free

ebook or something you can simply search on google, rewrite the whole content and then go. If

you want to be bully then simply copy paste that method and give it for free. Ask your friends to

place your free stuff clocked banner of URL to place on their websites or blogs.

Method9: Make your website or blog especially for sharecash

-- Converted from Word to PDF for free by Fast PDF -- [www.fastpdf.com](http://www.fastpdf.com) --

People just love free stuffs. When you are start getting some decent money from sharecash,

just invest in buying a domain and hosting and make website dedicated to downloading free

stuffs. SEO it regularly or to improve traffic always do yahoo answers posting along with link

back to your website. Just don't spam them otherwise you will be punished.

#### The Twitter Method

What is Twitter? Twitter is just like any other friend website, such as Myspace, Facebook, etc. Their word for adding is called follow, so follow = add When you follow someone (send them a friend request) they have to follow you back (accept your friend request) for both of you to be friends.

Requirements :

Common Knowledge Paypal Account 10-20 minutes everyday Email Account 1. Get 10 pictures of 10 different girls (try to find real ones, not models) 2. Make 10 twitter accounts, with fake girl names if you really can't think of a female name use this:

<http://u.bb/210311/name-generator> \*Use your email account for when it asks you for Email but do this trick if you want it use the same one for your 10 Twitter accounts\* For example- email - runescape@gmail.com email2- r.unescape@gmail.com email3- r.u.nescape@gmail.com etc. keep adding dots for different emails \*This is called the email dot trick\* \*This way it tricks the registration to say that it is a different email, but really its not \*You don't have to make 10 but its recommended because then you can get more money 3. Add your pictures to your twitter accounts. \*Remember to write down your twitter account names!\* 4. Register to <http://u.bb/210311/hellotxt> or <http://u.bb/210311/tweet3>

5. Add all your twitter accounts 6. Now whatever you put in for your status will send it for all the accounts making it look real (I recommend adding at least 2-4 updates per day) 7. Put stuff like, Good morning, Good night, etc. anything girly that you think will draw attention, questions and stuff. 8. Now Download Twitter Friend Adder or download from here

<http://u.bb/210311/twitter-freind-adder>

\*Now the reason i like this friend adder is because it adds 500 people in about 1-2 minutes, only thing is you have to exit out and open a new one if you want to use it again.\* 9. Click on "Account Manager" and then add all of your accounts, then hit "Save", now select any account under Username and fill in your password 10. Put "software" in for Keyword or anything else if you like 11. Set Freinds to add to 500 (NEVER GO MORE THAN THIS) \*If you go higher than this, there is a very high chance of getting banned and i have had that happened to me so I am just giving you a warning\* 12. Hit "Go" 13. Do this for all of your accounts. 14. Now wait around a day and go to

<http://u.bb/210311/twitter-karma>

\*You don't have to wait a day but its recommended, that way the people you are

following have time to follow you back\* 15. Enter your username and password for your account and hit "Hide avatars" then hit "Whack" \*Then Click on the drop down list and click on "Only Following", now scroll down and press "Check All" then "Bulk Unfollow" \*Now wait a little bit and click on the drop down list for "Only Followers", and then press "Check all" then "Bulk Follow" This website is way better than the old one you just gotta know how to use it right. 16. On the twitter karma website it requires you to wait before you go and follow the people that are following you back, so you should open 10 tabs and then fill out all the usernames and passwords then do everything one by one that way you can proceed without having to wait.

17. Now register to  
<http://u.bb/210311/revtw>

Please sign up under that link if you want to thank me \*Click "sign up" under where you enter username and password, now choose "Earn Money" option and fill in information, I recommend you use your real email for this\* 18. Click on "Twitter Accounts" tab and add all of your twitter accounts. 19. Now Go to "Setup Auto Post" and check "Enable Auto Post" \*If you cant find this, go to "Twitter Acts" tab and then look at the accounts name you want to set up autopost, then you can see on the right side it says "Setup Auto Post"

20. Now check "Select All" or whatever categories you would like, then hit "Submit" \*This puts 1 ad on your twitter account everyday, and every click is about \$.15/per click...so the more followers you have the more clicks! \*Once you get 1000 followers they let you do 2 ads per day\* 21. Now repeat this whole process once a day and keep your twitter updated. Now as most of you are aware your twitter success revolves around followers, thus the more followers the more clicks you'll get daily. I'm averaging about 100 clicks a day from ten accounts. My largest account has over 3000 followers and my smallest has roughly 1000 followers. DO NOT CLICK ON YOUR ADS!! \*If you click on your own ads, they will find out and they will ban you\*
