Hello!

Welcome to my guide for making money.

You will make money, if you put in an effort.

Thank you for buying.

_____

A verified Paypal account is essential for these methods to work.

_____

#1 ShareCash.org

"ShareCash is a revolutionary, next-generation upload site, where you get paid Cash for every download you get!

We offer the highest pay-outs per download, as well as a set of great tools, tutorials, and support to get you earning in no time.

Simply register, upload files, and let the cash start rolling in!"

_____

What this basically means:

You will upload a file to Sharecash, and they will provide you a link to download it.

Any individual that tries to download it, will have to fill out a short survey. They normally take 3-4 minutes to complete.

If the person fills out the survey, and downloads the file. You earn money. It is that simple, no catch.

You will earn you: $0.40 - $0.80 (Depending on the location of the person that downloaded the file)

_____

This is your first stepping stone to making money online,

Register here:

http://sharecash.org/

_____

If you need any more information, simply visit the site.

***Proof of Payment:**

http://forums.sharecash.org/viewforum.php?f=4 (Scroll Down)

_____

Methods:

After you have registered on Sharecash, you will be able to upload some files. "Uploads"

***200MB Maximum per upload

When uploading files, you must remember a few things.

- Quality:

Are you posting content that is truly wanted? Or is truly worthwhile completing a survey for?

For example:

You may upload a picture, or a selection of pictures.

Now ask yourself: "Would I fill out a survey, to get one picture?"

If you had any common sense, you would not bother.

But,

If the download was a .zip file for instance (that contained hundreds of pictures.) That would be worthwhile filling out a survey for, depending on your target market/niche etc.

Some things you could upload:

Pirated Games/Music/Software.

Spread these on Torrent sites or on "Wares/z" forums, Youtube etc.

Give the file a password and tell them they must download e.g: "password.txt" (Use your ShareCash link) If people are bothered to download the file, they won't mind doing a survey to get the password too. (Normally)

The Latest content will attract more attention, remember that. (E.g: keep an ear/eye out for the release of a popular artist's new album. If you're first to upload, you're first to get attention)

Porn!

Porn sells like milk, a lot!

You cannot host adults files on Sharecash, but you can trick people, into thinking it's porn.

Post your links on porn forums.

Post some screens of the video, and some video info. (Make it up)

Make sure that your videos/pictures are new. Nobody likes old porn. Except those of you who visit the "Granny section" (You freaks)

Fake stuff.

Many things sound too good to be true, most people avoid them, **but not all people.** (Where we step in)

Post, e.g: "Youtube Hacker" "Facebook Friend Adder" "Free Steam Hacker" "Free Habbo Credits" "Free Runescape Gold" "Free WOW Money" etc. On Youtube, forums etc.

You will always reel in a few bites. Be creative!

Give-aways!

This is a great method!

*If you are pretending to give away something (Not really going to give it away) Don't use real info/youtube account etc.*****

Upload a .txt file with a sentence on it. (Create it yourself)

Now make a video on youtube, or post on forums etc.

Something like this:

"Free Steam Account! First 50 people to download this: *link* and message me what it says, will go into a draw. I will randomly select one winner (random.org)"

As people message you with the code (whatever is in the .txt you uploaded) Give them a number. E.g: First person to message you is #1 and so on.

When 50 people have downloaded, go to www.random.org and randomly choose a number between number 1-50. If it's #47, give it to the 47th person.

#2 Pay Per Click!

There are similar sites to this, but this is probably the best:
http://adf.ly/

This site will pay you every time a person clicks a link. (You can combine this with your ShareCash links for max profit.)

#3 Selling Gift Cards

RewardBag is simple!

- Complete surveys for points
- Exchange points for Gift Cards (Lots available)

- Sell Gift Cards on Amazon, eBay etc. (Or keep them)

Register here: http://www.rewardbag.com

Proof:

#4 Must you spam!?

If you're lucky, you can get downloads spamming.

It all depends on your method, and your creativity.
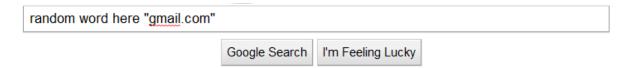

Method:

What you need:

- Fake Gmail Account
  - Firefox

- Firefox add-on: https://addons.mozilla.org/en-US/firefox/addon/4925
- Proxy/VPN (Something that changes your IP address)

Step 1.

Search google like this:

random word here "gmail.com"

Google Search   I'm Feeling Lucky

Replace "random word here" with any word you want.

Step 2.

- Click on the arrow, beside the Add-on's icon.
- Immediately Load > All Pages

Step 3.

- Wait a few minutes.
- Press "ctrl+a" then press "ctrl+c" (Copies whole page)
- Go to this website and paste your results in the large box:
  http://extractor.prusac.com/
- Stroll down and click: "start extracting emails"
- Copy it.

Step 4.

- Open up notepad
- Paste.
- Edit>Replace
- Find what: ".com."
- Replace with: ".com"
- Click "replace all"

Step 5.

- In your gmail account, click: "compose"
- Paste all the emails (from notepad) in: "To:"
- Be creative, look here how I have posted a link to a "personal" video.

Remember to use a proxy and a fake gmail account. (If you use gmail)

More methods:

Use a proxy and just spam! Spam on:
Youtube, Blogs, Facebook, Twitter, Myspace. Etc.
Spam anywhere!
Spam your link on chat rooms. etc.

#5 Social Engineering

- Create a Facebook
- Use the image of a very hot girl
- Edit your details (make the account seem real)
- Add lots & lots of friends each day
- Finally, get chatting to a few men
- Post your "pictures" *link*

- Rinse, and repeat.

The same can be done on Bebo, Myspace, Twitter. etc:

Join adult chat-rooms.

- Pretend to be a hot girl, and spam your link. (not literally)
- Get talking, and convince people (You're not a robot) then post a link.

MSN/Yahoo/IM etc.

- Use the above methods to get people's (Men) IM address's
- Send them "files" (cough) that are locked with a password. Include a text file, e.g: "Password: *link* "
- Rinse & repeat.

#6 Investment works!

MinuteWorkers
where time really is money

This method should be used when you have made some money first, as it requires some investment. (I will soon be using this)

On this site, you can pay people to download your ShareCash links.

Investment will go a long way at this website. This will make you serious money.

E.g:

A worker downloads your file, for a price.

He must give the text written in your file, and his IP address. (To prove he filled out the survey, and downloaded the file)

Let's do a little math:

If a person downloads your link, you earn between $0.40 - $0.80 ($.080 = US Citizen)

So if you create a job (only for US Citizens) They will get paid $0.10 but you make a profit of $.070

If you invest $5, it means you can pay 50 workers @ $0.10 to download your file.

50 x 80 = 4000 = $40 (Profit)

50 x 10 = 500 = $5 (Payment/Loss)

40 – 5 = 35 = $35

Turn $5 into $35

THE MATH IS THERE!

Register here: http://www.minuteworkers.com/

- Create a job

- Fill in the job information
- Category > Download and/or > Download only

- Fill out the extra info, and you are done!

#7 Making money with Twitter.

I do not use Twitter, and I have never used this method.
From what I see (and read) it works.
I bought this. I have full re-sale rights.

You can have it for free though, since I'm a nice guy.

This may be of use to you:

http://adf.ly/9dnl

I hope you feel that this e-book was worth your money. For the price stated, I honestly believe so.

If you make an effort,
you will have made back 20x + the cost of this e-book, in a day or two.

Take care,

- Sean. "GetScraped"
